

FlavorFlix usage instructions

The FlavorFlix app has 5 main tabs (pages) which are Home, Recipe page, Explore, Saved and Account.

In the **Home** tab you choose which media type is inspiring your next meal (F.E. Music, TV, Movie). Afterwards you use our search function for media where you can find a song, tv show, etc. that's inspiring your next meal. If you're a pro user you can add cuisine preferences like diet, difficulty and up to 2 cuisine regions. When you enter all information, you click the create recipe button and a loading screen will appear. If it's a already generated recipe the recipe will be displayed instantly, if it's a new recipe you will need to wait up to a minute, but you won't be bored as you will have a game to play while waiting. When the recipe loads the **recipe** page will be opened.

In the **Recipe** page you can view your generated recipe, recipe opened from explore, recipe opened from saved with all recipe information. You will see a lot of fun facts and the entire cooking instructions. You can like and dislike recipes to improve our service and if you are a pro user you can save the recipes.

In the **Explore** page you have a reel style page where you can explore recipes and the songs that inspired them.

In the **Saved** page you can view and delete your saved recipes if you're a pro user.

In the Account page you log in or sign up if you're not authenticated on you're device. When logged in you can manage your subscription status, log out of your account or delete it.
